

There are three primary colours - red, yellow and blue.

This photo contains mainly red and blue.
Where the two colours mix a third colour appears.

Can you name it?

Which two primary colours together become orange?

.....
.....

Which primary colours do you spot in this photo?

.....
.....

When you mix them you get

Colour samples

Which colours would you combine?
Are they mixed colours? Can you
mix them and which colour appears?

What does your colour combination
remind you of? An object, a feeling,
a particular landscape, a person...

Find out what someone
else would pick before
you get creating on the
next page!

Create your own landscape or skyscape!

Think of the colours you want to include and why.

Is it *an early morning,*
a sunset,
the middle of the night?

How will this change the light and colours in the sky and on the land?

First use pens
or materials
that you can stick
onto the last page.

paper
leftovers *leaves*
bits of
newspaper *packaging*

Then find one object
in each primary colour
in your surroundings
and place them
within your creation.

They don't have to be stuck, they could move and be exchanged with other objects to change the scene.

It's time to exhibit!

The image you created is the first one to go into the exhibition.

Have a look around which works of art could be exhibited alongside your image - photos, paintings, objects, texts, other images created by yourself or others...

Arrange the works on a wall, on a table, on the floor..

Do they *stand*, *lie*, *lean*, *overlap*, *stack*?

Invite family, friends or neighbours to see your arrangement in a responsible distance in person or virtually!

Tell them about the artworks and the colours within them.

Share images of your exhibition on Instagram using #BRAMLEYcreates

Here is a space to arrange your landscape or skyscape on:

Above the Clouds - COLOUR SPACE
